

We can send the American people a new economic stimulus bill to help families make ends meet and strengthen an economy that has now lost jobs every month this year.

We can pass the Defense authorization bill that provides our military with the funds they need to keep our country safe. It takes care of those who serve us bravely with an across-the-board 3.9-percent military pay raise and major investments in the physical safety and mental health of our troops, not the least of which is attempting to rebuild the military which is in a state of distress because of the Iraq war.

We can pass a Military Construction/Veterans Affairs appropriations bill to maintain and upgrade military facilities, build better military family housing, and ensure the care our veterans deserve.

We can pass a Defense appropriations bill to keep our Armed Forces prepared for combat and peacetime missions, relieve the strain of constant 12- and now 15-month deployments, and support highly classified initiatives in the fight against terrorism.

With the Presidential election drawing near, our time will be short. But with new cooperation from our Republican colleagues, we can do all this—and pass several other important bipartisan bills already passed by the House of Representatives.

So I wish all my colleagues well in their August travels. I know we are all weary from the long, difficult work period.

I also know the fights that await our return won't be easy. I hope a month back home will give our Republican colleagues a new appreciation for how America needs badly the changes they have blocked.

Our hands remain outstretched. Our eagerness to seek common ground remains as strong as ever. We will fight if we must, but we would much rather dance.

I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. WHITEHOUSE). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to a period of morning business with Senators permitted to speak therein for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS CONSENT AGREEMENT—S. RES. 624

Mr. REID. Mr. President, I ask unanimous consent that the Senate record

reflect the Senate adoption of Calendar No. 924, S. Res. 624, as reported by committee.

The PRESIDING OFFICER. Without objection, it is so ordered.

50TH ANNIVERSARY OF THE CROSSING OF THE NORTH POLE BY THE USS "NAUTILUS"

Mr. DODD. Mr. President, I rise today, joined by my colleagues Senators LIEBERMAN, REED, and WHITEHOUSE, to mark the 50th anniversary of a momentous occasion in our Nation's maritime history, an occasion that truly launched the American Navy into the Nuclear Age. On August 3, 1958, the USS *Nautilus*, the world's first nuclear powered submarine, became the first vessel to travel under the North Pole. The intrepid crewmen of the *Nautilus* received a Presidential Unit Citation for their service, and Operation Sunshine, as it was called, provided a powerful boost to American morale following the Soviet launch of Sputnik. Today, we mark this important milestone with a resolution honoring the *Nautilus*'s historic feat.

The USS *Nautilus*'s Arctic voyage was a remarkable feat of American naval engineering, demonstrating the evolution of submarines from slow underwater ships to warships that could submerge for many weeks and travel through varied depths and conditions, maintaining travel speeds of 20-25 knots. Submarines, as was proven that day, would pursue unconventional courses to achieve incredible results, in this case, traveling a much shorter distance than was thought possible, to reach strategically important destinations on the other side of the globe.

But most important, it marked a major milestone for our nuclear Navy, which would lead to other developments, such as submarines powered by single pressurized water reactors, and an aircraft carrier, USS *Enterprise*, powered by eight reactor units in 1960.

While the *Nautilus*'s successful voyage was an inspiration to all America, it serves a particularly important point of pride to our submariners, as well as the engineers and shipbuilders of the Electric Boat Division of General Dynamics, who have built our Nation's nuclear submarines in Connecticut for more than four decades. As a young boy, I attended the launch of the USS *Nautilus* in Groton, CT; and had the honor to witness my late mother christening the USS *Stimson*. My first cousin, Bill McAree, was one of the chosen few to serve in the nuclear submarine force under Admiral Rickover, and for 34 years, I have had the distinct pleasure of representing the home State of our Nation's premier undersea warfare facilities, including Naval Submarine Base New London.

As we commemorate the 50th anniversary of this important voyage, we must also look forward to the future of American naval power. As nations around the world continue to enlarge

their own submarine fleets, the U.S. ability to travel freely and swiftly beneath the waves represents a critically important component of U.S. seapower. Today, our submarine fleet is contributing invaluable surveillance and reconnaissance to our warfighters, and providing an important platform for operations in what the Navy calls "the littorals," or coastal areas. Our military has no more stealthy means for delivering power than the submarine, carrying Navy SEAL teams to enemy territory undetected, or traveling to specific locations to launch cruise missiles. Submarines are not merely weapons of war, they are tools of statecraft, providing critical intelligence to policymakers and serving as a critical deterrent to promote stability throughout the globe. And it is submarines' demonstrated ability to traverse the world undetected, at any point in the ocean, even the North Pole, that makes the work of our silent service, our submariners, so critically important to our national security.

As we look back on the first 50 years of America's nuclear submarine program, the United States must be ready to continue the great legacy of the USS *Nautilus*, its crewmen, shipwrights, and designers, and remain in the forefront of submarine development.

COSPONSORSHIP—S. 3406

Mr. HATCH. Mr. President, through an oversight of our two offices we neglected to add Senator DOLE as an original cosponsor to this act when we introduced it last night. Senator DOLE is a leader on disability issues and should be commended for her and her husband's commitment to individuals with disabilities.

Mr. HARKIN. Mr. President, I want to apologize to the Senator from North Carolina for this oversight. Our legislation, S. 3406, enjoys broad support among advocates for individuals with disabilities, and I want everyone in that community to know that Senator DOLE intended to be an original cosponsor of this measure. We look forward to working closely with her and the rest of our colleagues to pass this measure when the Senate reconvenes in September.

RETIREMENT OF GENERAL RICHARD A. CODY

Mr. LEAHY. I rise to commend GEN Richard A. Cody, the Vice Chief of Staff of the Army, on his retirement. General Cody is one of the Nation's finest military officers, and, with a career that spans over 36 years in the Army, he leaves behind a stronger, more experienced, and more professional fighting force. Vermont is proud to call General Cody a native, and there is little doubt that his time growing up in our State capital, Montpelier, instilled in him a deep sense of loyalty and public service.
